

ABSTRACT OF THE DISCLOSURE

An ink jet head has a substrate and partition walls disposed on a main surface of the substrate and spaced apart at a preselected interval to form channels. An ink chamber plate is connected to the substrate to define with the partition walls an ink chamber for supplying ink to the channels. A passage forming member has an ink supply passage disposed in communication with the ink chamber for supplying ink contained in an ink storage device to the ink chamber and at least one ink discharge passage for discharging ink from the ink chamber.
